Mozingo Lake
City Ramp
Maryville, MO
7:00am - 2:30pm

TO BENEFIT:

what is CYSTIC FIBROSIS?

- Cystic fibrosis (CF) is a genetic disease affecting approximately 30,000 children and adults in the United States.
- CF causes the body to produce an abnormally thick, sticky mucus, which clogs the airways and can lead to fatal lung infections.
- 10 million Americans, one in 28 people, carry one defective CF gene, which does not cause the disease or any symptoms. The disease develops when a child inherits two defective CF genes, one from each parent.

who is TRAVIS FERGUSON?

Diagnosed with cystic fibrosis at 3 months, Travis' life was filled with interests like any boy - he was an avid and skilled fisherman, history buff and Nebraska football fan. His father, Doug, remembers Travis as **"Never asking for much, other than to live. He had a real desire to live."** Travis really enjoyed life, he tried not to let CF interfere.

Dr. Tom Osborne, former Nebraska head football coach, is joining the fight for the cure by being the honorary chairperson. Dr. Osborne's personal commitment with Travis and his family began in September 1998, while Travis was awaiting a double lung transplant. They had talked about a fishing trip after Travis regained his strength from the transplant. Unfortunately, Travis passed away in April, 1999 from complications. He had just turned 17.

FISH FOR A CURE

Come join the fun as friends,
family and fishermen
honor the memory of Travis
Ferguson by "FISHING FOR
A CURE." Entrants will compete against
each other in a Bass tournament for great
prizes. All proceeds benefit the Cystic
Fibrosis Foundation.

OUTDOOR EVENTS/GATHERINGS

Because of risks to people with cystic fibrosis (CF), individuals who have ever had confirmed positive sputum culture for *Burkholderia cepacia* (B. cepacia) complex shall not attend any Foundation events. These requirements are because CF germs can be passed between individuals who have CF. B. cepacia in a person with CF can cause serious respiratory illness and, in some patients may lead to death. CF germs are not a risk for otherwise healthy individuals. At any outdoor event, people with CF should keep at least 6 feet away from others with CF.

Despite this policy, individuals with CF might choose to attend events without informing the CF Foundation or without the Foundation's knowledge. If so, they do so at their own risk. The Foundation accepts no responsibility for any risk to health involved in attendance, or in any social contact between persons with CF. For more information, please visit www.cff.org.
